Colon Cancer
Screening
Education

- Are you African American and between 45 and 64 years old?
- Are you a patient at Bond Community Health Center or Neighborhood Medical Center?
- Are you due for colon cancer screening?

If you answered **“Yes”** to these questions... **You can participate in an educational study about increasing colon cancer screening.**

The objective of this study is to test a Community Health Advisor intervention for promoting stool-based colon cancer screening among African Americans.

This research is funded by the National Institute on Minority Health and Health Disparities and the lead researcher is Dr. John Luque in FAMU Institute of Public Health, (850) 561-2054.
